Selected Exhibitions

«Space Relations» at International Office, 511 Building, Portland, USA, November 2022
«Too Hot to Sell» at Hotel Tiger, Zurich, March 2023
«Aux Abris» with sabl.live, Lausanne, April - June 2023
«Pastureland» Duo Show with Elio Müller, Community Center Embrach, September - December 2023
«Utstilling av uferdige arbeider» during Residency at Lavangsnes Wunderkammer, Sjøvegan, Norway, April 2025
«Oltre la pietra» with Matazz at Castel Grande, Bellinzona, May 2025
«Kunststipendien der Stadt Zürich 2025» at Helmhaus, Zürich, July - September 2025
«Ozeane Fliessen Aufwärts» with 6 1/2 and Hotel Tiger at Unterwerk Selnau, Zürich, May - June 2026

Curation

«Mischkulturen» at Berghof127, Embrach, July - September 2025
«Hofgemeinschaften» at Berghof127, Embrach, June - August 2026

I grew up on Berghof, a farm with berries, vegetables and grains. It is where my disciplines come together and where what I work from grows. I run exhibitions there, mostly outdoors, and am converting the fields into an agroforestry system: rows of trees with crops between them. It moves the fields closer to a forest edge, finely structured and overgrown, where insects and birds find food and shelter.

My art deals with these processes and treats farming as a cultural practice that demands close attention to plants and soil. My work is process-oriented: I experiment in sculpture, painting and farming.

***Permakultur Experimentierfeld,* 2025**
(ongoing)
plants, straw, wire fence, deadwood, insects, microorganisms, soil
20 x 60m

„Past the truffle field, you find the permaculture field, which was initiated this year by Pascal Weidmann and planted together with his family. It is an attempt to think of agriculture as a creative, aesthetic, and social process. Different plant species grow here in deliberately mixed beds, accompanied by observation, care, and experimentation.
The field moves between sculpture and painting; towards a living system that changes and, in part, organizes itself.“

***Landscape Paintings,* 2025**
fertilizer on canvas
5 x 45 x 60cm

„In his work, Pascal Weidmann explores how soil is formed, used, and perceived. He focuses on ecological processes and the relationship between humans and the land they cultivate. His practice also incorporates conversations with farmers, fieldwork, and scientific studies. “Landscape Paintings” reflects on the aesthetics of cultivation and the difficulty of finding landscapes untouched by monocultures. The work, constructed in layers of various fertilizers, is influenced by agroecological ideas such as resilience and interdependence. For, as Weidmann emphasizes, agricultural work is comparable to artistic work: both require care, attention, and the ability to read living systems and given material circumstances, to respond to them, and to adapt to them. How landscape is represented in art therefore also influences how we perceive and treat our own environment.“

113 x 39 x 90 cm

„For Pastureland, Pascal Weidmann embarked on a journey to places from his childhood and family history, creating a fictional scenario of Earth‘s over-fertilization and excessive pesticide contamination. In various works, he subjected collected soil samples from pastures, meadows, forest floors, and farmland to processes such as extraction analysis or added pesticides from ecological agriculture. For a series of works, he treated the samples with trace element fertilizers and then subjected them to a metamorphosis: at 1050 degrees Celsius in the oven, he fused minerals and metals into a unique conglomerate while organic structures burned away. Speculative artifacts and the analysis of a future archaeology result from complex processes aimed at connecting the present, future, and past.“

***Where Will My Next Stop Be?*, 2023**
intervention in mailbox
grass, soil
13 x 41 x 27 cm

„Individual grasses grow out of the letterbox. It is a small space that the meadow occupies, yet it is an invasive gesture. How did the meadow get into the letterbox? Was it sent by post? Was it transplanted? Or had it spread out itself and taken up space? Weidmann questions the relationship between man and nature. Meadows are present in our landscape, used as farmland or as a recreational zone. But this is always on the terms of us humans.“

(Text and photos by Samantha Zaugg, Hotel Tiger)

***Samples from the Farm (27.03.23),* 2023**
20 glass bottles, plants, soil, water, wood, plant lamp
30 x 40 x 50 cm

The plants are contained in glass bottles, creating their own ecosystem with soil and water. To ensure their survival, a lamp providing blue and red light was installed above the crate.

They were exhibited among other stored artworks in a civil defense bunker and monitored through video cameras by sabl.live.

Collaboration with Ricardo Meli

The project originated from a competition for public art by the Department of Building Construction of the Canton of Zurich and Strabag AG.

„We brought three different soils into the city: one from a forested area in Thurgau, where Ricardo Meli grew up, one from my parents‘ farm, and one from the nature reserve examined in the ‚Humus Project.‘ The coordinates lead to the exact locations. Shifting plants and soil from one place to another is a recurring element in my work.“

(Text by Pascal Weidmann)

***Humus Project (Geoforensic Research and Transformation of an Extensive Humus Displacement),* 2022**
joint walk and discussions in a nature reserve, 2h

The area around the shooting range in Embrach had to undergo remediation after decades of contamination, requiring the removal of a large amount of surface soil. As compensation, an agriculturally used field, along with its upper soil layers, was removed to create a nutrient-poor meadow.

At this location, Pascal Weidmann brought together involved and affected individuals: experts, farmers, and activists. Discussions revolved around soil displacement, nature conservation, agriculture, remediation of contaminated sites, trees, bird hunting, and vegetarianism.

***Plant a Plant (Blueberry),* 2022**
performance based on a score, 10min

Score:

Plant a plant.

Bring with you:
-plant with a special meaning to you
-water
-shovel

Search for the nearest park.
Dig a hole with your shovel.
Place the plant in the hole.
Fill the hole with soil.
Water the plant.
